- M-20 Administrative Expenses as a Percent of Benefits Paid, by Industry and Zone (2009 2015)

Overview

The Pension Benefit Guaranty Corporation (PBGC) was established by the Employee Retirement Income Security Act of 1974 (ERISA) to ensure that participants in defined benefit pension plans receive their pensions if their plans terminate without sufficient assets to pay promised benefits. The PBGC administers separate insurance programs to protect participants in Single-Employer and Multiemployer plans.

The PBGC has published Pension Insurance Data Books and Tables annually since 1996 to present detailed statistics on PBGC program operations and benefit protections. Beginning with the 2015 Data Tables, PBGC is releasing the data in groups, as they become available.

Current and prior years' collection of Data Tables are available on the PBGC's website at: www.pbgc.gov/prac/data-books.html

A revision was made to Table S-3 on 07/18/2018 to correct for the values presented for plans which terminated in recent years. A revision was made to Table S-19 on 08/30/2018 to correctly move plans between the 'Other Manufacturing' and 'Fabricated Metal Products' categories.

| PBGC DATA | BOOK AT A GLANC | E | |
|---|---|---|---|
| | Single-Employer Program (Dollars in millions) | Multiemployer Program (Dollars in millions) | Combined Programs (Dollars in millions) |

Sources: PBGC Pension Insurance Data Book Tables S-1, S-2, S-3, S-20, S-30, S-31, M-1, M-2, M-3, M-4, M-5 and M-6.

*Beginning in FY 2009, PBGC started to report premium income net of bad debt expense for premium, interest, and penalties.

In FY 2014 this item was renamed to more accurately reflect the figure presented. It was previously referred to as "New Plans Trusteed or Pending Trusteeship". *The number of payees includes those receiving a periodic pension benefit payment and those who received a lump-sum benefit payment from PBGC

during FY 2015. *****Less than \$500,000.

*****For purposes of this chart, claims are defined to include the excess of liabilities over assets without regard to recoveries from plan sponsors.

Due to rounding of individual items, numbers may not add up exactly across columns.

| Table S-1 Net Financial Position (1980-2017) Single-Employer Program | | | | | | | | |

Due to rounding of individual items, numbers may not add up across columns.

*Trusteed terminations include plans pending trusteeship.

Claims figures shown in this table are calculated on a plan basis and identified with fiscal year of plan termination for each plan.

Claim values and distributions are subject to change as PBGC completes reviews.

Values presented for Claims are the difference between liabilities and assets unless noted as Net Claims, which also consider recoveries from trusteed plans.

The annual numbers of trusteed terminations shown in this table may differ from those reported elsewhere as they reflect the fiscal year of plan termination rather than the fiscal year in which the loss was incurred.

| Total | \$49,002,749,967 | \$25,850,392,150 | 52.8% | \$23,152,357,816 | 47.2% |

For purposes of this chart, claims are defined to include the excess of liabilities over assets without regard to recoveries from plan sponsors.

Annual claims for Top 10 firms are summations of all claims in that fiscal year associated with the Top 10 firms. See Table S-5 for a list of the Top 10 firms with the largest claim values.

Values presented for Claims are the difference between liabilities and assets unless noted as Net Claims, which also consider recoveries from trusteed plans. Claim values and distributions are subject to change as PBGC completes reviews.

| | Table S-5 Top 10 Firms Presenting Claims (1975-2016) Single-Employer Program | | | | | | | | | |
|-----|--|--------------------|---|---------------------|------------------------|---|-------------------------------|--|--|--|
| | Top 10 Firms | Number of Plans | Fiscal Year(s) of Plan Termination(s) | Claims (by firm) | Vested Participants | Average Claim Per Vested Participant | Percent of Total Claims | | | |
| 1. | United Airlines | 4 | 2005 | \$7,304,186,216 | 122,483 | \$59,634 | 14.9% | | | |
| 2. | Delphi | 6 | 2009 | 4,820,596,418 | 66,614 | 72,366 | 9.8% | | | |
| 3. | Bethlehem Steel | 1 | 2003 | 3,702,771,655 | 92,174 | 40,172 | 7.6% | | | |
| 4. | US Airways | 4 | 2003, 2005 | 2,708,858,934 | 60,585 | 44,712 | 5.5% | | | |
| 5. | LTV Steel* | 6 | 2002, 2003, 2004 | 2,134,985,884 | 83,782 | 25,483 | 4.4% | | | |
| 6. | Delta Air Lines | 1 | 2006 | 1,710,043,418 | 13,237 | 129,187 | 3.5% | | | |
| 7. | National Steel | 7 | 2003 | 1,319,009,116 | 35,152 | 37,523 | 2.7% | | | |
| 8. | Pan American Air | 3 | 1991, 1992 | 841,082,434 | 53,624 | 15,685 | 1.7% | | | |
| 9. | Trans World Airlines | 2 | 2001 | 668,377,105 | 32,197 | 20,759 | 1.4% | | | |
| 10. | Weirton Steel | 1 | 2004 | 640,480,970 | 9,825 | 65,189 | 1.3% | | | |
| | Top 10 Total | 35 | | \$25,850,392,150 | 569,673 | \$45,378 | 52.8% | | | |
| | All Other Total | 4,734 | | 23,152,357,816 | 1,703,811 | 13,589 | 47.2% | | | |
| | Total | 4,769 | | \$49,002,749,967 | 2,273,484 | \$21,554 | 100.0% | | | |

Values presented for Claims are the difference between liabilities and assets unless noted as Net Claims, which also consider recoveries from trusteed plans.

Data in this table have been calculated on a firm basis and, except as noted, include all trusteed plans of each firm.

Claim values and distributions are subject to change as PBGC completes reviews.

Due to rounding of individual items, numbers and percentages may not add up to totals.

Vested participant count is as of the date of plan terminiation.

* Does not include 1986 termination of a Republic Steel plan sponsored by LTV.

Values presented for Claims are the difference between liabilities and assets unless noted as Net Claims, which also consider recoveries from trusteed plans.

Claim values and distributions are subject to change as PBGC completes reviews.

Claim calculations represent aggregated and average counts of plans, claims, and participants over the stated period.

The number of vested participants and claim values are calculated as of date of plan termination.

Due to rounding of individual items, numbers may not add up to totals and percentages may not add up to 100%.

*Claims in 2016 dollars are calculated using Consumer Price Index - Urban Consumers.

During FY16 PBGC completed a payment system conversion. The figures presented are based on a reconciliation of the two systems.

Lump-sum payments include cash-outs of pensions with de minimis present values and back payments to current pensioners.

Since some payees received both pensions and lump-sum payments, total number of payees may be less than the sum of pensioners and lump-sum recipients.

Excludes participants in plans that are in probable termination status as of end of fiscal year.

Due to rounding of individual items, numbers may not add up across columns.

This table is developed primarily using data from PBGC's Payment System (PPS). Some recently terminated plans are still in the process of being added to PPS. Because it's possible that some of those plans may have terminated before the current fiscal year, all terminated plans that are not yet in PPS are shown as a separate line item.

Due to rounding of individual items, numbers may not add up to totals and percentages may not add up to 100%.

| Table S-22 PBGC Payees and Benefit Payments by Size of Trusteed Plan (Fiscal Year 2016) Single-Employer Program | | | | | | | | | | | |

| Total | 837,410 | 100.0% | \$5,545 | 100.0% | \$535 | \$278 | | | | | |

Due to rounding of individual items, numbers may not add up to totals and percentages may not add up to 100%.

Beginning with the 2016 data tables, plan size was determined as of the Date of Plan Trusteeship. Prior to the 2016 Tables, plan size had been based on current participant counts. During FY16 PBGC completed a payment system conversion. The figures presented are based on a reconciliation of the two systems.

Table S-23

| Total | 837,410 100.0% | \$535 | 472,771 | 100.0% | \$674 | 364,638 | 100.0% | \$356 | |

This table is based primarily on data provided by the PBGC's Payment System (PPS).

Due to rounding of individual items, numbers may not add up to totals and percentages may not add up to 100%.

Ages are calculated as of the last day of the fiscal year.

Beginning in fiscal year 2014 the percentages displayed represent the proportion of each age group within each gender.

During FY16 PBGC completed a payment system conversion. The figures presented are based on a reconciliation of the two systems.

The weights to calculate averages was updated for the 2016 data tables.

Hybrid plans incorporate elements of both defined benefit and defined contribution plans but are treated as defined benefit plans. They often express benefits in terms of an account balance. The two most common types of hybrid plans are Cash Balance Plans and Pension Equity Plans. Because most hybrid plans converted from traditional defined benefit plans, not all participants will receive benefits based on the hybrid plan design.

* For plan years beginning in 1990 – 2007, plans that satisfied specified criteria regarding contributions were exempt from the VRP.

** For plan years beginning after 2006, plans sponsored by small employers (generally fewer than 25 employees) qualify for an additional cap (i.e., \$5 times the square of the number of plan participants). For such plans, the maximum VRP owed is the lesser of the small-employer cap and the general VRP cap shown above.

*** 1994 legislation provided for eliminating the VRP cap subject to a three-year transition period. During the transition, (i.e., for plan years beginning 7/1/94 – 6/30/1996), the VRP cap was \$53 plus an variable amount based on the plan's funded status. Legislation re-establishing a cap on the VRP was enacted in 2012 and first applied to plan years beginning in 2013.

*Excludes plans paying PBGC Termination Premium.

** Interest rates for valuing vested benefits for PBGC variable-rate premium for plans with premium payment years beginning in January of the respective year.

*** Beginning in 2008, plans were required to use spot segment interest rates published by the IRS for calculating a plan's vested liabilities to determine their variable-rate premiums. The first segment rate applies to benefits expected to be paid within five years, the second to benefits expected to be paid from five to twenty years in the future, and the third to benefits expected to be paid more than twenty years in the future.

Data for plan years prior to 1999 include only plans with 100 or more participants.

Due to rounding of individual items, numbers may not add up across columns.

* Vested liabilities have been adjusted to the PBGC rate that, along with an assumed mortality table, reflects the cost to purchase an annuity at the beginning of the relevant year. The assumed mortality table was UP-84 for 1980-1992, GAM-83 for 1993-2006, and the mortality table found in section 1.412(l)(7)-1 of the Income Tax Regulations for 2007 and later. Before plan year 2012, durations of 15.02 and 5.32 for non-annuitants and annuitant liability, respectively, were used in the calculation. Beginning with plan year 2012 these durations were updated. The new values are 14 and 9 for non-annuitants and annuitants, respectively. As a point of reference the underfunding for 2012 derived using the previous factors would be \$720,178.

Data for plan years prior to 1999 include only plans with 100 or more participants.

Due to rounding of individual items, numbers may not add up across columns.

* Vested liabilities have been adjusted to the PBGC rate that, along with an assumed mortality table, reflects the cost to purchase an annuity at the beginning of the relevant year. The assumed mortality table was UP-84 for 1980-1992, GAM-83 for 1993-2006, and the mortality table found in section 1.412(I)(7)-1 of the Income Tax Regulations for 2007 and later. Before plan year 2012, durations of 15.02 and 5.32 for non-annuitants and annuitant liability, respectively, were used in the calculation.

Definitions:

(A) Underfunding calculated from Internal Revenue Service Form 5500 Series Filings. Vested liabilities have been adjusted to the PBGC rate that, along with an assumed mortality table, reflects the cost to purchase an annuity at the beginning of the relevant year. The assumed mortality table was UP-84 for 1980-1992, GAM-83 for 1993-2006, and the mortality table found in section 1.412(I)(7)-1 of the Income Tax Regulations for 2007 and later. Funding information from PBGC premium filings was used in 2008 whenever Form 5500 data was not available. Vested liabilities are used as a proxy for PBGC-guaranteed benefits.

(B) Underfunding data from PBGC premium filings used to calculate the variable-rate premium. Underfunding is based on vested benefits.

(C) Underfunding for plan sponsors with less than investment-grade bond ratings. Underfunding is based on estimated vested benefits.

(D) Estimated total liabilities are based on all plan liabilities, whether vested or not. The same adjustment that is applied to and described in the footnote for the group labeled (A) is applied to this gro

Only (A) and (B) represent the universe of PBGC-insured plans. Firms and plans included in the column (C) totals may differ from year to year. See "Underfunding Measures in Table S-47" in the Pension Insurance Data Book 2005, pp 16-23, for a further explanation of these measures.

Before plan year 2012, durations of 15.02 and 5.32 for non-annuitants and annuitant liability, respectively, were used in the calculation. For plan year 2012 these durations were updated. The new values are 14 and 9 for non-annuitants and annuitants, respectively. As a point of reference the underfunding for 2012 derived using the previous factors would be \$720,178 for subgroup (A) and \$803,637 for subgroup (D).

Due to rounding of individual items, numbers and percentages may not add up to totals.

Industry classifications are based on principal business activity codes used in the North American Industry Classification System.

* Vested liabilities have been adjusted to the PBGC rate that, along with an assumed mortality table, reflects the cost to purchase an annuity at the beginning of the relevant year. The assumed mortality table was UP-84 for 1980-1992, GAM-83 for 1993-2006, and the mortality table found in section 1.412(I)(7)-1 of the Income Tax Regulations for 2007 and later. Before plan year 2012, durations of 15.02 and 5.32 for non-annuitants and annuitant liability, respectively, were used in the calculation. For plan year 2012 these durations were updated. The new values are 14 and 9 for non-annuitants, respectively.

| 2018 | \$5,420.45 | \$65,045.40 | | | | | | | |

Table S-53

The Employee Retirement Income Security Act of 1974 (ERISA) mandates that the maximum guaranteed amounts be adjusted annually based on changes in the Social Security contribution and benefit base.

The maximum guarantee shown applies to workers who retire at age 65. PBGC increases the maximum guarantee for people retiring later than age 65 and reduces it for retirees taking earlier retirement or electing survivor's benefits.

In some instances, where a pension plan has adequate resources or PBGC recovers sufficient amounts, a participant may receive benefits in excess of the maximum guarantee.

The Pension Protection Act of 2006 provides that if a plan terminates while the sponsor is in a bankruptcy entered into after September 16, 2006, the applicable guarantees will generally be those for the year the sponsor entered bankruptcy regardless of the year the plan actually terminates.

Sources: PBGC Annual Reports and internal calculations.

(1) A number of plans received financial assistance in more than one year.

(2) Lump-sum payments were made to these insolvent multiemployer plans to facilitate mergers and closeouts.

(3) These plans received periodic payments before receiving lump-sum payments.(4) Three of these five plans received periodic payments before receiving lump-sum payments. (5) Two of these plans received small lump-sum payments to finalize closeouts initiated in 2008. These two plans are not included with plans receiving a lump-sum payment for 2009.

(6) Six of these seven plans received periodic payments before receiving lump-sum payments.

(7) Total for plan columns represents the total number of multiemployer plans that ever received the stated type of financial assistance from PBGC's Multiemployer Insurance Program.

(8) Only one plan has repaid any of its past financial assistance. That plan repaid only the principal amount of the loans it received.

During FY16 PBGC completed a payment system conversion. The figures presented are based on a reconciliation of the two systems.

Due to rounding of individual items, numbers and percents may not add up to totals.

Industry classifications are based on principal business activity codes used in the North American Industry Classification System. However, whenever a sponsor indicated its activity as "Insurance & Employee Benefit Funds," a code covering the principal activity of plan participants was determined and substituted.

| 2015 | \$478,227 | \$1,116,058 | 43% | \$638,122 | \$290 | 2.46% | | | |

Data for plan years prior to 1999 include only plans with 100 or more participants.

Due to rounding of individual items, numbers may not add up across columns.

* Vested liabilities have been adjusted to the PBGC rate that, along with an assumed mortality table, reflects the cost to purchase an annuity at the beginning of the relevant year. The assumed mortality table was UP-84 for 1980-1992, GAM-83 for 1993-2006, and the mortality table found in section 1.412(I)(7)-1 of the Income Tax Regulations for 2007 and later. Before plan year 2012, durations of 13.27 and 5.41 for non-annuitant liability, respectively, were used in the calculation. For plan year 2012 these durations were updated. The new values are 14 and 8 for non-annuitants and annuitant, respectively. As a point of reference the underfunding for 2012 derived using the previous factors would be \$553,842.

Data for plan years prior to 1999 include only plans with 100 or more participants.

Due to rounding of individual items, numbers may not add up across columns.

* Vested liabilities have been adjusted to the PBGC rate that, along with an assumed mortality table, reflects the cost to purchase an annuity at the beginning of the relevant year. The assumed mortality table was UP-84 for 1980-1992, GAM-83 for 1993-2006, and the mortality table found in section 1.412(I)(7)-1 of the Income Tax Regulations for 2007 and later. Before plan year 2012, durations of 13.27 and 5.41 for non-annuitants and annuitant liability, respectively, were used in the calculation. For plan year 2012 these durations were updated. The new values are 14 and 8 for non-annuitants and annuitants, respectively. As a point of reference the underfunding for 2012 derived using the previous factors would be \$553,842.

The new values are 14 and 8 for non-annuitants and annuitants, respectively.

** Less than 0.05 of one percent.

***Terminated Booked plans are plans that are expected to become insolvent and whose liabilities have been included in PBGC's financial position and liabilities. However they are not yet insolvent and may never require assistance. Assets are taken from the Schedule H and liabilities are estimated based on Present Values of outstanding liabilities.

Due to rounding of individual items, numbers may not add up to totals and percentages may not add up to 100%.

* Vested liabilities have been adjusted to the PBGC rate that, along with an assumed mortality table, reflects the cost to purchase an annuity at the beginning of the relevant year. The assumed mortality table was UP-84 for 1980-1992, GAM-83 for 1993-2006, and the mortality table found in section 1.412(I)(7)-1 of the Income Tax Regulations for 2007 and later. Before plan year 2012, durations of 13.27 and 5.41 for non-annuitants and annuitant liability, respectively, were used in the calculation. For plan year 2012 these durations were updated. The new values are 14 and 8 for non-annuitants and annuitant liability.

** Less than 0.05 of one percent.

| Table M-15 PBGC Maximum Guaranteed Benefits (1980-2018) Multiemployer Program | | | | | | | | |
|--|---|------------|-------------|--|--|--|--|--|
| Date of Plan InsolvencyMonthly Benefit FormulaMaximum Monthly GuaranteeMaximum Annua Guarantee(30 Years of Service)*(30 Years of Service)*(30 Years of Service)* | | | | | | | | |
| September 27, 1980 to December 21, 2000 | The participant's years of service multiplied by the sum of: (1) 100% of the first \$5 of the monthly benefit accrual rate -plus- (2) 75% of the next \$15 of the monthly benefit accrual rate | \$487.50 | \$5,850.00 | | | | | |
| On or after December 22, 2000** | The participant's years of service multiplied by the sum of: (1) 100% of the first \$11 of the monthly benefit accrual rate -plus- (2) 75% of the next \$33 of the monthly benefit accrual rate | \$1,072.50 | \$12,870.00 | | | | | |

* The formula presumes that the workers' monthly benefits are calculated by multiplying the monthly benefit accrual rate (a plan-specified dollar amount) times years of service. If the monthly benefit accrual rate prior to December 22, 2000, was less than \$20 per year of service or if the accrual rate after December 21, 2000 is less than \$44 per year of service then the maximum benefit guarantee for a participant with 30 years of service will be lower than the amounts shown. Note that there is no cap on applicable years of service; 30 years was selected for illustrative purposes only.

** The increased guarantee does not apply to multiemployer plans that received financial aid from PBGC between December 22, 1999, and December 21, 2000. The original, lower monthly benefit guarantee continues to apply to participants in these plans.

| Table M-16 PBGC's Historic Premium Rates (1974 - 2018) Multiemployer Program | | | | | | | |
|--|--|--|--|--|--|--|--|
| For Plan Years Beginning | Premium Rate (per participant) | | | | | | |
| September 2, 1974 - August 31, 1979 | \$0.50 | | | | | | |
| September 1, 1979 - September 26, 1980 | \$0.50 for plan years beginning in September, 1979, growing gradually to \$1.00 for plan years beginning September 1, 1980 to September 26, 1980 | | | | | | |
| September 27, 1980 - September 26, 1984 | \$1.40 | | | | | | |
| September 27, 1984 - September 26, 1986 | \$1.80 | | | | | | |
| September 27, 1986 - September 26, 1988 | \$2.20 | | | | | | |
| September 27, 1988 - December 31, 2005 | \$2.60 | | | | | | |
| 2006 - 2007 | \$8.00* | | | | | | |
| 2008 - 2012 | \$9.00 | | | | | | |
| 2013 | \$12.00 | | | | | | |
| 2014 | \$12.00 | | | | | | |
| 2015 | \$26.00 | | | | | | |
| 2016 | \$27.00 | | | | | | |
| 2017 | \$28.00 | | | | | | |
| 2018 | \$28.00 | | | | | | |

* Beginning in 2007, this amount is adjusted annually based on changes in the national average wage index (as defined in section 209(k)(1) of the Social Security Act). The adjusted premium rate is rounded to the nearest multiple of \$1. Premium amounts for 2012 and again for 2015 were reset as a result of legislation, and continue to be adjusted (from that higher level).
